

Sanitizing Solution

How to mix bleach (chlorine) solution for sanitizing:

What you'll need:

- Ordinary household bleach solution and water
- Tablespoon
- Measuring cup
- Spray bottles – label container “sanitizer”

To sanitize:

Mix 1 tablespoon of household bleach with 1 gallon of water for a solution strength of 200ppm. Put sanitizing solution in spray bottles and label “sanitizer”.

Remember:

- Make a new sanitizing solution at the start of your event.
- Do not mix bleach with detergent.
- Using chlorine test strips, check the strength of the solution.
- Discard sanitizing solution every 3 hours or as needed. The strength of the solution will be weaker at the end of the day.
